

Advantages of ScoringAg Packing Plant Solution

-  ScoringAg's Packing Plant System satisfies the mandatory ID Recordkeeping System for livestock traceback
-  ScoringAg satisfies FSIS (Division of USDA) requirements for traceback
-  ScoringAg satisfies FDA regulation's to require the maintenance of records of the product received and product shipped
-  ScoringAg gives the consumer complete confidence in knowing that the product purchased has traceback; and, if custom killed, the product is from the original animal brought in for slaughter
-  ScoringAg gives your establishment the right to sell meat products to any grocery chain because of traceback technology's ability to verify the source
-  ScoringAg brings your establishment up to date with all federal and state regulations for animal and meat identification and retail sales
-  ScoringAg does not require any rewiring or remodeling of the plant where it is installed
-  ScoringAg allows rapid, specific source tracebacks with ease, if needed
-  ScoringAg allows your establishment to be more efficient with less production losses
-  ScoringAg brings your establishment into the 21st Century
