

ScoringAg's Catastrophic Event System for Reporting and Tracking Disease Outbreaks

A Governing Agency decides to use ScoringAg.com for:

- ✓ Site-Specific Recordkeeping™
- ✓ Any **catastrophic animal** or **invasive organism** event with **real time** data entries
- ✓ **128-bit encryption** for **secure** events transmission with login and password
- ✓ Photos and 1.5 MB **video**
- ✓ 1000-word notes fields with **automated Activity Date** and **Time**
- ✓ DataMatrix barcodes for **online cell phone record access and display**

Steps for Reporting and Tracking a Catastrophic Event

- STEP 1** Governing Agency mandates **State and Local Health Inspection Officials** to open an account with **login** and **password** and **enters his location** with **photo** and **description**
- STEP 2** **Official** **observes disaster** or **emergency situation** at the location where it occurs
- STEP 3** **Official** **adds new location record** with diagnostic notes, photos and video of animal, plant or location situation **to his account**
- STEP 4** **Official** contacts **Emergency response Organization "Gatekeeper,"** submitting login and password for his account and records of event
- STEP 5** **Emergency Response Organization "Gatekeeper"** approves photos and video with ScoringAg administrative tools, then submits login and password for this account to the **Governing agency**
- STEP 6** One or more Governing Agencies Officials can **review and add notes** and other **data** to the record **at the same time and advise how to take action**
