

ScoringAg Solution for Packing Plants - Slaughter Houses - Meat Plants and Lockers - Fabrication

Problem / Question	ScoringAg.com Solution / Answer
Why do packing plants need the ScoringAg database?	This is the only way to satisfy FDA and international regulations for positive source verification
How do I capture the animals' data?	Enter or scan data in your personal, secure account in the ScoringAg database
Do I have to buy software?	No software to buy or disks to lose
What happens to the animal ID at slaughter or processing?	Once data is entered into ScoringAg database, a barcode is created that carries the live animal's unique ID and other data through the packing plant during processing
How is data kept during slaughtering and fabrication?	ScoringAg patented barcodes or RFID labels carry data through every process, from slaughter to the shipping station
Which cut can be identified?	Everything from carcass to sides, quarters, primal parts, and finally to the commodity cuts; also included are hide, organs, and other items
For which size of packing house is this ScoringAg Slaughterhouse system made?	The smallest custom packer up to the largest high-speed processing line
Why does ScoringAg work for small and big processors?	The system is scalable to meet everybody's needs, demands, and speed
Do I have to make changes to my installations?	ScoringAg's packing plant system is simple and does not require reorganizing or rewiring the plant, or changing the flow pattern of fabrication
What do I need to start with ScoringAg?	<ul style="list-style-type: none"> ✓ Open an account in ScoringAg Computer or laptop Ear tag reader Laser scanner for barcode labels Printer for barcode labels
How much does it cost to open an account in ScoringAg?	You need for every piece of meat leaving your plant a commodity record for US-\$ 0.0025 each Minimum price to Open an Account is only US-\$ 10.00
Which records do I need for my business?	PIDC (Premise IDentification Code) location record
How much does it cost?	US-\$ 0.55 per location
Which information is on ScoringAg barcode labels?	All required information about the individual animal and information you choose to identify your micro-branded product

Advantages for Packing Plant Operators with www.ScoringAg.com

- Simple, easy-to-use, scan-and-print barcode labeling transfers source ID from receiving dock to final product
- Low-cost system doesn't require plant rewiring or reorganization
- No need for segregation in the plant

Where is The Beef?
