

World Breaking News

3 different ways to find an entity or location in a split second:

1. If you have a tagged animal with an RFID chip, you can search for it by typing in the **RFID** Number
2. If you have an entity with no RFID (visual tag, tattoo, brand), our system creates a unique Entity ID Number (**SSI-EID**)
3. If you have only a location without any labeled entity, you can search by our unique **PIDC** (Premise **ID**entification **C**ode)

Go to our webpage www.ScoringAg.com, click on our new Search button in the left hand column, and try it out, using the following numbers as samples:

RFID 804000000045821

SSI-EID 030053744

PIDC 011M13N47222310MW0874409+000

There is no other system in the world with these possibilities.

Forget **traceback** in days or hours.

Use www.ScoringAg.com to find a record of an **animal, plant or location in split seconds.**
